Skills

- **Programming Languages:** Java, Python, X++, C/C++
- **Web Development:** HTML, CSS, JavaScript, Django, Bootstrap, jQuery
- **Technologies:** Microsoft Dynamics 365, SQL
- **Other:** Machine Learning

Education And Training

2024

B.Tech :

Computer Science & Engineering

Amity University

Uttar Pradesh

Completed my engineering with 8.27

CGPA

2020

Intermediate Certificate:

Stella Maris Inter College

Lucknow

Passed my Intermediate with 83.75%

2018

ICSE:

High School

Stella Maris Inter College

Lucknow

Passed my High School with 90.6%

Certifications

- Microsoft Dynamics 365: Finance and Operations Apps Developer Associate (2024)
- Web Development, MyCaptain (2023)
- SQL, Coursera (2023)
- Python, TechGyan (2022)
- Machine Learning, AcmeGrade (2022)

STUTI DUTTA

Summary

Aspiring software engineer with a solid foundation in computer science, proficiency in Java, Python and JavaScript, and a passion for creating innovative solutions for optimized performance. Seeking a role to apply where I can apply my technical knowledge, contribute to dynamic projects, and continue professional growth in the software development field.

Experience

Yamaha Motor Private Limited - Graduate Engineer Trainee

Delhi

07/2024 - 02/2025

- Managed the company's internal **ERP system (AX 2012)** to optimize client workflows.
- Developed and customized solutions using **X++** in **Microsoft Dynamics** to improve system functionality.
- Supported **Microsoft Dynamics 365 Finance and Operations (D365 F&O)** implementation and ongoing maintenance.
- Provided technical assistance to ensure **consistent system performance** and reliability.

Research Design & Science Organisation - Summer Intern

Lucknow

06/2023 - 08/2023

Heart Disease Prediction: Developed an **ML model** using **NumPy**, **Pandas**, and **Scikit-learn**, achieving **85% accuracy** for heart disease risk assessment. Integrated into a **Django-based web application** for **real-time predictions** with a user-friendly interface.

MyCaptain - Workshop Facilitator

Lucknow

10/2022 - 01/2023

- Coordinated **training programs** for **50+ mentees**, ensuring smooth execution under senior guidance.
- Prepared and managed **datasets of mentees** for program tracking.
- Monitored **weekly sessions**, improving engagement through feedback analysis.

Projects

Connect Four Web Game

02/2025-03/2025

Developed an interactive two-player game using **JavaScript**, **HTML**, and **CSS**, featuring **real-time turn tracking** and **win detection** for horizontal, vertical, and diagonal conditions on a **6x7 grid**. Designed a **responsive UI** with **Bootstrap** and custom **CSS**, leveraging **jQuery** for efficient DOM manipulation.

Drowsiness Detection

09/2023-04/2024

Built an **ML model** using the **Haar Cascade algorithm**, **OpenCV**, **dlib**, and **NumPy** to detect active, drowsy, and sleepy states, achieving **85% accuracy**. Enhanced robustness with **Convolutional Neural Networks (CNN)** and **transfer learning** techniques.

Amazon Website

03/2024

Replicated Amazon's frontend using **HTML**, **CSS**, and **JavaScript**, implementing **responsive product listings** and dynamic navigation with **hover effects** and form validation.

Face Recognition (Summer Training)

06/2022 - 08/2022

Developed an **ML model** for **Face Recognition** using **OpenCV** and **Matplotlib**, achieving **75% precision** in detecting faces in images during **AcmeGrade** training.
